ABOUT THE WORKSHOP

This talk is a short introduction to Videofluoroscopy (VFS) interpretation and is suitable for both clinicians who are experienced or inexperienced in performing VFS. The speaker will introduce pathophysiologies commonly viewed in VFS with the use visual examples. The speaker will also share on how he analyzes VFS systematically using a method that he has developed, and how to select suitable strategies to be trialed during the procedure accordingly to patient's presentation. This session will allow experienced clinicians to share their views on VFS as well.

Outline of the talk:

- Short introduction about VFS
- Pathophysiologies viewed in VFS
- Esophageal phase screening
- How to interpret VFS systematically

ABOUT THE SPEAKER

Mr. Yoon Wai Lam is a private Speech Therapist and the director of Speech Therapy Works LLP. He has more than 10 years of experience working with adults with speech-language and swallowing disorders. He began his career in Singapore General Hospital (SGH) in year 2001. In year 2006, he moved on to set up Speech Therapy Works to provide locum services to the acute hospitals, community hospitals and private hospitals. In year 2008, he joined National University of Singapore as a Part-time Lecturer in the Masters in Speech-Language Pathology (SLP) programme, teaching Dysphagia and Motor Speech Disorders.

Throughout his 13 years of practise, he has developed training programmes and conducted various workshops both locally and overseas. He has trained many Speech Therapists and Speech Therapist students into conducting Clinical Bedside Swallowing Evaluation, Videofluoroscopy, Fiberoptic Endoscopic Evaluation of Swallowing, and dysphagia management. He is often consulted upon by his peers and doctors for complex cases involving dysphagia. The “*Tennis Player*” case was one of the many complex cases that he has successfully treated.

He developed the “Chin Tuck Against Resistance Exercise” (CTAR) and the research paper was published in the *Dysphagia Journal* (April 2014, Volume 29, Issue 2).
